

AHMED SAUD DURRANI

Cybersecurity Professional | Penetration Testing | Threat Analysis

✉ askd05811@gmail.com ☎ +92 304 4330054

PROFESSIONAL SUMMARY

Cybersecurity professional with expertise in vulnerability assessment, penetration testing, malware analysis (FLARE VM, REMnux 7), APK analysis (MobSF), Android pentesting, threat monitoring, and incident response. Strong analytical mindset with deep experience identifying, exploiting, and remediating complex security weaknesses across web, network, and mobile environments.

CORE COMPETENCIES

Security Assessment	Tools & Platforms	Certifications
● Vulnerability Assessment ● Penetration Testing ● Malware Analysis ● APK Analysis	● Burp Suite, Nmap, Nessus ● Kali Linux, FLARE VM ● Splunk, Wireshark, Snort ● Cisco, Palo Alto, FortiGate	● CEH, CySA+, CCNA, MCSA ● ISO 27001, PCNSA ● AppSec, VCA, MCP

Technical Skills: ASP.NET, SQL Server, JavaScript, Windows Server, Network Design & Security; Web App Pen Testing (OWASP Top 10); Network Pen Testing (enumeration, service discovery, vuln assessment, exploitation, priv-esc, lateral movement); API Security Testing (REST/GraphQL, authn/authz), Pcap analysis, Log monitoring

EDUCATION

MS Cybersecurity — Webster University, USA | 2019
BS Software Engineering — Beaconhouse National University, PK | 2015

PROFESSIONAL EXPERIENCE

Penetration Testing Security Analyst — National Cybersecurity Response Team (NCert)

Jul 2025 – Present

- Conduct vulnerability assessments across web, network, and mobile environments
- Perform malware analysis using FLARE VM and REMnux 7
- Conduct APK assessment using MobSF and perform Android penetration testing
- Utilize Burp Suite, Nmap, and custom scripts for scanning and exploitation
- Conducted VAPT assessments of over 10 PSCA Safe Cities, assessing critical infrastructure security
- Prepare detailed PoCs, reports, and remediation recommendations
- Conducts the validation and assessment of web vulnerabilities affecting national, private-sector, and provincial-level organizations across Pakistan. Coordinates and monitors the vulnerability remediation process with the relevant organizations and issues official certificates of recognition to security researchers/reporters upon successful remediation and closure of reported vulnerabilities.
- Receives, analyzes, and coordinates the reporting of cybersecurity threats, incidents, and adversarial activities, ensuring that relevant information is appropriately escalated and communicated to the concerned authorities and stakeholders for necessary action.

- Secured enterprise infrastructure including firewalls, routers, and Windows Server 2016/2019
- Configured Cisco and FortiGate firewalls; performed network security optimization
- Performed internal/external scans using Nessus and maintained audit documentation
- Designed secure networks and deployed Fortinet firewalls
- Improved network efficiency by ~45% through routing and BGP optimization

Cyber Security Engineer — Greenray Solutions

Dec 2017 – Mar 2023

- Performed SIEM monitoring, threat detection, and log analysis using Splunk and Snort
- Executed vulnerability assessments with Nessus and Nmap
- Investigated phishing campaigns and malicious activity
- Conducted network traffic, DNS, firewall, and email log analysis

Associate Software Engineer — Dove Pharma Co

Feb 2016 – Jan 2017

- Developed ASP.NET applications and SQL modules
- Trained users and improved workflows
- Performed system analysis and recommended enhancements

Professional cybersecurity expertise with a proven track record in enterprise security and threat management
